

Outstanding 802.3at PoE+ Network Solution for
Hardened Environment
Select your new network engine!

As a leading provider of network equipment for Industrial Communication, Benchu group understands the importance of providing stability and safety that can adapt to your business' needs, whether in the Safe City, Traffic, Mining, industrial automatic, Power or energy.

The IES7211-8PGE2GF-DC with IP40 protection class and meet EMC industrial level 4 requirements. The product supports wide power input voltage range of 48-54VDC redundant power with reverse polarity protection and wide operating temperature range of -40 to the +85°C.

The switches can be easily installed on a DIN rail as well as in distribution boxes. In addition to its compact size for space-saving installation, each product has passed a 100% burn-in test to ensure its quality high-reliability transmission.

The IES7211-8PGE2GF-DC is equipped with 8-10/100/1000BASE-T Gigabit Ethernet ports and 2-1.25GBASE-X SFP interfaces with redundant power input. Its 8 Gigabit Ethernet ports are integrated with an 802.3at PoE+ injector function. It offers a DIN-Rail mountable, safe and reliable power solution for outdoor industrial environments deploying Power over Ethernet networks

Support 2 Ports 1G SFP Uplink, provides efficient transmission and powerful processing capacity. The administrator can flexibly choose the suitable SFP transceiver according to the transmission distance or the Fiber type required to extend the network efficiently.

Highlights

Benchu group IES7211-8PGE2GF-DC Industrial PoE+ Switch, featuring 8-10/100/1000BASE-T 802.3at PoE+ ports with each port powering up to 30 watts, and 2-1.25GBASE-X fiber ports, its in a IP40 rugged metal case, can be installed in any difficult environment. Support 8kV lightning protection, ensures high network availability by preventing downtime caused by power surges. support redundant power input, ensures continuous operation even if one power source fails, the risk of network outages due to power supply failure is significantly reduced. DIN-Rail mounting allows for compact and organized installation of industrial PoE switches, maximizing the use of available space. Wide temperature range, low-power consumption and fanless design, It is able to operate reliably, stably and quietly in the temperature range from -40 to 85 degrees C.

Key features include:

- Complies with IEEE 802.3af/at Power over Ethernet
- Up to 8 ports of IEEE 802.3af/802.3at devices powered
- PD alive check function
- Each port supports 52V DC power to PoE powered device
- Auto detects powered device (PD)
- Circuit protection prevents power interference between ports
- Remote power feeding up to 100m
- Hardware-based 10/100/1000Mbps auto-negotiation and auto MDI/MDI-X
- Flow control for full duplex operation and back pressure for half duplex operation
- Integrates address look-up engine, supporting 8K absolute MAC addresses
- Automatic address learning and address aging
- Supports Energy-Efficient Ethernet (EEE) function (IEEE 802.3az)

Build a future-proof network with BENCHU:

- Solid performance with non-blocking architecture, 8K MAC addresses, 24Gbps Backplane bandwidth, 14.88Mpps Switch Throughput, 9216 bytes Jumbo Frame
- Up to 8 ports of IEEE 802.3af/802.3at devices powered
- PoE+ support on all ports, PoE power up to 30 watts for each PoE port
- 2 Dedicated SFPs, Extends network distance up to 2KM/20KM/40KM/60KM/80KM/120KM with optical fiber.

Fast Access

- The remote units provide the full line-speed forwarding capability. All ports support non-blocking data packet forwarding, providing users with high-speed access experience and meeting the requirements of high-bandwidth services such as HD video conferencing, online video, and large file download.

BENCHU Quality and Reliability

- Low power consumption, fanless.
- High strength aluminum alloy shell
- IP40 Industrial design
- Contact Discharge 8KV DC; Air Discharge 15KV DC
- -40 to 85 degrees operating temperature
- Dual power input
- Din Rail mounting installation
- CE, FCC, RoHS,CB.

Easy operation and maintenance

- Hardware-based 10/100/1000Mbps auto-negotiation and auto MDI/MDI-X.
- Flow control for full duplex operation and back pressure for half duplex operation
- Supports Energy-Efficient Ethernet (EEE) function (IEEE 802.3az)
- Din Rail mount installation and dual power input
- Plug and play, No configuration required
- The user-friendly panel can show the device status through the LED indicator of PWR, Link.

Hardware at a Glance

FRONT					REAR	SIDE
Model Name	Form-Factor	10/100/1000Base-T RJ45 ports	1GBASE-X Fiber SFP Ports	PoE+ 802.3at Ports	Power Supply	Fans
IES7211-8PGE2GF-DC	Din Rail mounting	8	2	8 PoE+	Dual power input DC48~54V	fanless

Performance at a Glance

Model Name	Chip	Packet buffer	Fabric	Switch Throughput	MAC Address Table	Jumbo Frame	Latency (Max Connection Speed)
IES7211-8PGE2GF-DC	Realtek	1.6MB	24Gbps	14.88Mpps line-rate	8K MAC	9216 bytes	1G Copper: <3.35μs 1G Fiber: <3.1μs

Features and Benefits

Hardware Features	
1000BASE-T Copper Ethernet PoE+ connections	Support Surveillance, Wi-Fi AP, VoIP, Access control and Speaker, deployments, scal-able for future growth. Never face the risk of running out of PoE ports.
1.25GBASE-X SFP Combo ports	Two 1.25Gb SFP ports for aggregation to the network core. Support for Fiber and Copper modules.
Redundant Power Input	By having a secondary power supply, the switch can seamlessly switch to the backup power, maintaining network connectivity without interruption.
8kV Lightning Protection	Enhanced protection minimizes the risk of costly repairs and replacements, maintaining network stability and reliability in environments prone to lightning activity.
Wide Operating Temperature Range of -40 to 85°C	Remains reliable in both extremely cold and hot environments. Reliable performance in extreme conditions reduces downtime and maintenance needs, ensuring continuous operation.

Target Application

Network Convergence

Across various industries—particularly in industrial parks, automation, power, public safety, and energy sectors—the adoption of IoT devices such as VoIP phones, IP security cameras, video-over-IP endpoints, proximity sensors, LED lighting, and secure access door locks is rapidly increasing. The close concentration of these devices demands industrial network switches with PoE capabilities, allowing network managers to connect IoT devices using a single cable for both data and power. Advanced devices like Wave 2 802.11ac wireless access points and HD surveillance cameras with features like night vision and motion tracking require PoE+ (802.3at) power. Additionally, harsh environments necessitate industrial-grade network switches with enhanced durability, further increasing the power requirements for Industrial PoE switches.

The BENCHU GROUP 10-port Industrial PoE Switches support dense deployments of these modern high-power PoE+ devices. They offer enhanced performance and a focus on usability within Industrial environments:

- Provide 8-10/100/1000M 802.3af/at PoE+ ports
- 2 dedicated 1Gb SFP fiber ports for aggregation to the network core
- Dual power input --- the risk of network outages due to power supply failure is significantly reduced.
- Wide Operating Temperature Range of -40 to 85°C
- Contact Discharge 8KV DC; Air Discharge 15KV DC
- High strength aluminum alloy shell, IP40 Industrial design
- Excellent features such as fast response, resisting vibration, enduring dust, adapting for the hard environment, etc.
- Plug and play, No configuration required --- simplifies the installation process
- Limited Lifetime* Warranty, Tech support
